Re: Christopher M. Sainz

Dear Scott:

This letter is to commend your company and specifically your employee, Chris Sainz, on the excellent renovation and expansion of our office in Chicago. We often deal with various consultants and representatives of different companies and your company really stands out. Chris was a great communicator and kept us informed about scheduling for the various parts of the project. He was effective in dealing with the subcontractors and with the management company of our building. Various phases of the project were finished faster than expected and with minimal disruption to our employees and our operation. The quality of the work completed was precise and it was all done in the neatest and cleanest possible manner.

It was a pleasure working with Chris and Bear Construction and we look forward to using you again should the need arise. We will definitely recommend you to anyone who needs General Contracting and Construction Management Services.

Sincerely,
